ABOUT

Description"Hi! I'm Muhammad Kamran, a passionate frontend web developer with two years of hands-on expertise, I have a strong command over crafting visually appealing and user-friendly websites. I specialize in front-end development, creating seamless user experiences across devices.

EXPERIENCE

- Collaborated with a small business to redesign their website.
- Transformed wireframes into fully functional HTML and CSS JS pages.
- I will convert any Figma, PSD design to HTML page.
- Ensured the website was mobile-responsive and optimized for SEO.
- Wrote custom HTML and CSS JavaScript for existing websites.
- Studied user requirements to gain strong understanding of project initiatives and deadlines.
- Developed user-friendly web forms with validation and error handling.
